REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a decoding method and apparatus. The closest prior art, Kobayashi (USPN 6,411,229 B2), shows a similar system, in which, a variable length decoder which can reduce the processing time, the variable length decoder comprises plural decoding table address generation circuits, and a selector for selecting one of plural address candidates generated from these circuits. During decoding of one variable length code, the variable length decoder obtains address candidates for the next variable length code, and then selects one of the address candidates for the next variable length code on the basis of an obtained code length of the variable length code, to output the same to the decoding table RAM. However, Kobayashi fails to address: "for a comparison step of comparing input coded data with the minimum code words or maximum code words outputted from the table selected at a table selection step by using N comparators and a class discrimination step of obtaining a class number corresponding to an initial code word of the input coded data based on results of comparison by the N comparators". These distinct features have been added to all independent claims and render them allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
